

Exp 8:

Demonstrate use of docker commands to pull ubuntu official image, create a file and push updated image on Dockerhub.

In Vs code after installing docker

```
docker --version
```

```
docker login
```

```
docker run -it -d ubuntu
```

```
docker images
```

```
docker tag 08d22c0ceb15 adef04584/test
```

```
docker images
```

```
docker push adef04584/test:latest
```

```
docker pull adef04584/test
```

```
docker images
```

```
docker push adef04584/test:latest
```

```
docker pull adef04584/test
```
